Efficacy of NFL Game Predictors

OA3801 Final Project Presentation

ENS Ford Knippa
ENS Walker Lee
ENS Patrick Oliver
ENS Brennan Penafiel

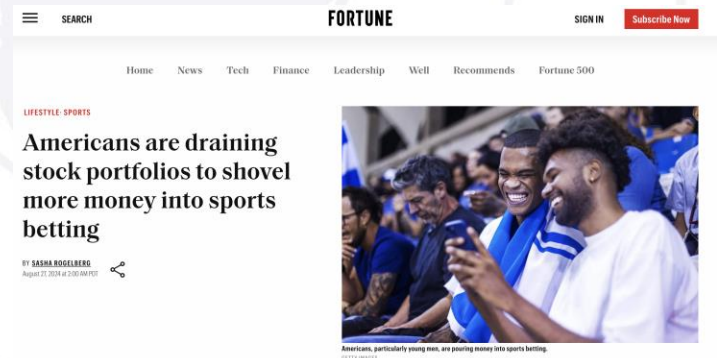

OA3801 - Summer 2024

- Background
- Finding the Data
- Cleaning the Data
- Methodology
- Analysis
- Conclusions

How good is Vegas in predicting the outcomes of NFL Games?

- Predicting the outcome of NFL games before they occur is a major area of interest for financially motivated sports data analysts.
- Sportsbooks (i.e. casinos) employ oddsmakers to create these predictors considering many different factors.
- Terms to know:
 - The favorite is the team expected to win the game and is "giving" points.
 - The underdog is the team expected to lose and is "getting" points.
 - Oddsmakers set a point spread to represent the expected margin of victory by which the favorite is supposed to win the game.
 - When a spread is covered, it means that the team favored by the spread has won by more points than the spread itself, or the underdog has lost by fewer points than the spread or won outright.
 - The over and under refer to wagers on whether the combined total score of a game will be higher or lower than a number set by the sportsbook. Betting the "over" means you predict the score will exceed the set number, while betting the "under" means you expect it to fall short.

- Using a data set from Kaggle, we were initially presented with three data frames:
 - Team characteristics (44 total teams)
 - Stadium characteristics (120 stadiums)
 - Game results (14,073 games from 1966 to 2023)
- What data should we use?

- Remove games prior to 2002
 - League became 32 teams with updated divisions in 2002
- Account for team name changes and relocation
 - Redskins ➡ Washington Football Team ➡ Commanders
 - Oakland Raiders ➡ Las Vegas Raiders
 - San Diego Chargers ➡ Los Angeles Chargers
 - St. Louis Rams ➡ Los Angeles Rams
- New stadium names
 - For example, Mercedes-Benz Superdome ➡ Caesars Superdome
 - Only current NFL stadiums are included in our analysis
 - Weather data is included in stadium information data frame, need to account for name changes to include weather data in our analysis

- Merge data frames (team characteristics, game results, stadium information)
- Calculate the result of each game
 - Given:
 - Spread
 - Over/Under line
 - Final score
 - Calculate:
 - Was the spread covered?
 - Did the over or under hit?
 - Did the favored team win?
- Game results used for analysis

Gambling Warning

Carolina Panthers

NFL Analysis Based on Team

Over/Under ▼

Overall NFL ▼

☒ Regular Season ☐ Playoffs

Regular Season Over/Under Distribution for Overall NFL

- Over/Under
 - Should be even and non-skewed
 - Over/Under is the threshold line that leads to an even outcome divergence
 - Vegas has accurately set a diverging threshold near the total score of 4,137 NFL games at a ratio of 1/2 for the past 21 years
 - Extremely successful!

NFL Analysis Based on Team

- Favorite
 - Should be skewed
 - Favorite is the team that is determined to have greater odds of winning
 - Vegas has accurately predicted the winning team in 4,137 NFL games at a ratio of 2/3 for the past 21 years
 - Significantly successful!

NFL Analysis Based on Team

Spread Coverage

Overall NFL

☒ Regular Season ☐ Playoffs

Regular Season Spread Coverage Distribution for Overall NFL

- Spread Coverage:
 - Should be skewed
 - Spread is the predicted point differential that the favored team will win by
 - Vegas has accurately predicted the spread being covered in 4,137 NFL games at a ratio of 3/4 for the past 21 years
 - Extremely successful!

Regular Season Over/Under Distribution for Dallas Cowboys vs All Other Teams

First Dash Demonstration, 7

- Interactive interface allows for exploration of large amount of data
- Opponent teams are ordered by number of matchups from most to least

First Dash Demonstration, 8

Sat, Aug 24 · Final	Pre Season · Week 3	Sun, Sep 8	Week 1
►  Chargers	26	★ Cowboys	1:25 PM
★ Cowboys	19	 Browns	
Sun, Sep 15	Week 2	Sun, Sep 22	Week 3
 Saints	10:00 AM	 Ravens	1:25 PM
★ Cowboys		★ Cowboys	
Thu, Sep 26	Thursday Night Football	Sun, Oct 6	Sunday Night Football
★ Cowboys	5:15 PM	★ Cowboys	5:20 PM
 Giants		 Steelers	
Sun, Oct 13	Week 6	Sun, Oct 27	Sunday Night Football
 Lions	1:25 PM	★ Cowboys	5:20 PM
★ Cowboys		 49ers	
Sun, Nov 3	Week 9	Sun, Nov 10	Week 10
★ Cowboys	10:00 AM	 Eagles	1:25 PM
 Falcons		★ Cowboys	

First Dash Demonstration, 9

☒ Regular Season ☐ Playoffs

Regular Season Over/Under Distribution for Dallas Cowboys vs All Other Teams

- Why is this dashboard useful?
 - When the Cowboys play the Giants, the total score tends to be over the Over/Under line in 65.5% of the 29 games played from 2002-2023.
 - The projected total score tends to be underestimated more often in this matchup compared to the overall NFL prediction rate of 49.1%
 - Impress your friends for no financial gain with this information!

NFL Analysis Based on Team

☒ Regular Season ☐ Playoffs

Regular Season Spread Coverage Distribution for Dallas Cowboys vs All Other Teams

First Dash Demonstration, 12

- Main Conclusion from First Dashboard:
 - Vegas is extremely successful at accurately predicting NFL game outcomes when analyzing the Over/Under, Favorite, and Spread Coverage for the past 21 years
 - By knowing this, you can equip yourself with accurate knowledge (to impress your friends, not to make money)

Second Dash Demonstration, 1

Let's look at some external factors that may affect tomorrow's season opener!

NFL Week 1 of 18			
GAMES	NEWS	STANDINGS	PLAYERS
 Ravens  Chiefs	Tomorrow 5:20 PM  6:11	 Packers 	Fri, Sep 6 5:15 PM  6:10
 Panthers  Saints	Sun, Sep 8 10:00 AM  6:01	 Vikings 	Sun, Sep 8 10:00 AM  5:36
 Patriots  Bengals	Sun, Sep 8 10:00 AM  5:41	 Steelers 	Sun, Sep 8 10:00 AM  6:21
All times are in Pacific Time			Feedback

Second Dash Demonstration, 2

- From the Sportsline graphic below (which we used solely as a prediction tool and for no betting related purposes!) we can see that Baltimore is favored for tomorrow's game at -3.5, with an over/under line of 55

**Kansas City
Chiefs**

Second Dash Demonstration, 8

- What can we take away from this?
- Vegas is still extremely good at predicting spread, over/under, and picking favorites
- External factors do not substantially shift the outcomes one way or another

- Expanding to look at other sports
- Incorporate more real-time data
